

Tricky

- a) Circle the groups of 3 to help you complete the sentences and calculation.

The first step has been done for you.

There is group of 3 thousands.

There are groups of 3 hundreds.

There is group of 3 tens.

There are groups of 3 ones.

$$3,936 \div 3 = \boxed{}$$

Use the place value charts to work out the divisions.

a) $8,532 \div 2 = \boxed{}$

b) $5,296 \div 4 = \boxed{}$

c) $6,078 \div 6 = \boxed{}$

- b) Use the place value chart to work out $8,404 \div 4$

$$8,404 \div 4 = \boxed{}$$

Trickier – Complete the questions on the right hand side of tricky first before attempting the questions below

Complete the divisions.

Mr Porter has saved £8,934
He shares it equally between his three grandchildren.
How much do they each receive?

Use $<$, $>$ or $=$ to make the statements correct.

$3,495 \div 5$	<input type="text"/>	$3,495 \div 3$
$8,064 \div 7$	<input type="text"/>	$9,198 \div 7$
$7,428 \div 4$	<input type="text"/>	$5,685 \div 5$

Could you have calculated the answer to part f) more efficiently?

Trickiest – Complete the word problem and <, > or = questions from trickier above and then tackle the challenge questions below

Work out the values of *a*, *b* and *c*.

9,415						
<i>a</i>	<i>a</i>	<i>a</i>	<i>a</i>	<i>a</i>	<i>a</i>	<i>a</i>

<i>b</i>	<i>b</i>	<i>b</i>	<i>b</i>	<i>b</i>	<i>b</i>	<i>b</i>	<i>b</i>
5,328							

120	120	120	120
<i>c</i>	<i>c</i>	<i>c</i>	<i>c</i>

a =

b =

c =

Books are available to buy in three different deals.

Deal A	Deal B	Deal C
		
£12.99	£38.16	£25.60

Which is the best deal? _____
 Show your workings.

Jack is calculating 2,240 ÷ 7

He says you can't do it because 7 is larger than all of the digits in the number.

Do you agree with Jack?
 Explain your answer.

Find the missing digits.

a)

		2	2		1	
		8	9	6		

b)

		3		6		
		6	5		4	

Spot the Mistake

Explain and correct the working.

Thousands	Hundreds	Tens	Ones
			

	3	1	0	1
3	9	4	1	4

Answers - Tricky

There is group of 3 thousands.

There are groups of 3 hundreds.

There is group of 3 tens.

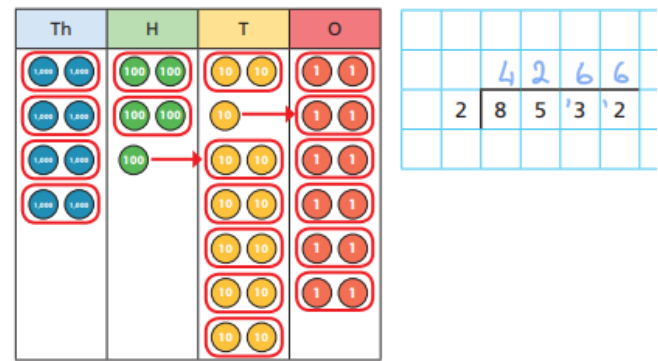

There are groups of 3 ones.

$$3,936 \div 3 = \boxed{1,312}$$

j) Use the place value chart to work out $8,404 \div 4$

a) $8,532 \div 2 = \boxed{4,266}$

Trickier

Mr Porter gave each grandchild £2,978

$$699 < 1165$$

$$1152 > 1134$$

$$1857 > 1137$$

Trickiest

Find the missing digits.

a)

		2	2	4	1
	4	8	9	6	4

b)

		3	2	6	2
	2	6	5	2	4

A = 1,345

B = 666

C = 80

Deal B is the best deal to purchase

Jack is calculating $2,240 \div 7$

He says you can't do it because 7 is larger than all of the digits in the number.

Do you agree with Jack?
Explain your answer.

Jack is incorrect. You can exchange between columns. You can't make a group of 7 thousands out of 2 thousand, but you can make groups of 7 hundreds out of 22 hundreds.

The answer is 320

Spot the Mistake

Explain and correct the working.

Thousands	Hundreds	Tens	Ones
1000 1000 1000	100 100 100	10	1 1 1
1000 1000 1000	100		1
1000 1000 1000			

	3	1	0	1
3	9	4	1	4

There is no exchanging between columns within the calculation. The final answer should have been 3,138
